EDUCATION

- **University of Opole**
  Engineer of Computer Science
  2021 - 2025

LANGUAGES

Polish | Native
English | B2+

SKILL

- JavaScript
- TypeScript
- Java
- C#
- HTML5
- CSS
- SASS
- React
- React Native
- Responsive Web Design
- Java Spring Boot
- .NET Framework
- WPF
- .NET MAUI
- RESTful API
- Firebase
- Postgres
- Redux Toolkit
- UML
- GIT

CERTIFICATIONS

2023 | Udemy
UML and Object-Oriented Design
UC-13476457-b086-4fae-ac4d-76a17e6f00d8

PROFILE

Experienced Frontend Developer with a strong background in React, React Native, JavaScript, and TypeScript, as well as expertise in Redux Toolkit and React Router Doom. Proficient in backend technologies, including C#, .NET Framework, Java, and Java Spring Boot, with a focus on creating efficient and scalable applications. Adept at quickly learning new technologies and adapting to changing project requirements. Passionate about continuous skill improvement and collaborating with others to develop innovative and effective solutions.

WORK EXPERIENCE

Reactjs and React Native Mobile Developer
MyTaple
Aug 2022 – Feb 2023 (7 months)

I developed and maintained web and mobile applications using Reactjs, React Native, TypeScript, and Redux in an Agile environment. My key responsibilities included designing and maintaining components integrated with Firebase APIs, and applying my knowledge of component lifecycle, state management, and navigation for enhanced user experiences. The result of our efforts was "mytaple", an application that consolidates local events, offers, and media into one platform, delivering them to users based on their location.
- **Skills:** TypeScript, Redux Toolkit, Firebase, Navigation, React Native, Navigate, and Figma.

Intern .NET Developer
CODEFUSION Sp. z o.o.
Jul 2022 (1 month)

As part of a collaborative team, I contributed to the creation of an Android mobile app using .NET MAUI. I focused on utilizing the MVVM design pattern, and was involved in the development of the backend, UI, and push notifications. JSON was employed for data storage to ensure efficient data handling. A key goal throughout was to ensure a user-friendly, accessible experience for all users. The final product of our collective efforts, an application named "Halo Odpady", is now available for download.
- **Skills:** LINQ, MVVM, XAML, C#, and .NET MAUI.

PROJECT

Bookshelf
https://github.com/petitoff/bookshelf

The website allows users to browse, read, and rate books online, as well as create reading lists and share books with friends.

- **Technologies**: Reactjs, TypeScript, Firebase, Redux Toolkit, React Router DOM

Task Manager
https://github.com/petitoff/todo-app

The Task Manager is a web application designed to streamline project and task management within teams. To ensure secure user authentication and authorization, the application implements JSON Web Tokens (JWT) for session management.

- **Technologies**: Java Spring Boot, RESTful API, JWT, Spring Security, Postgres, Reactjs, TypeScript, Redux Toolkit, React Router DOM
