## PROJECT

### Bookshelf

*https://github.com/petitoff/bookshelf*

Bookshelf is a modern web application built using ReactJS with TypeScript, Firebase, Redux Toolkit, and React Router DOM. The website allows users to browse, read, and rate books online, as well as create reading lists and share books with friends.

- **Technologies**: ReactJS. TypeScript, Firebase, Redux Toolkit, React Router DOM

### Task Manager

*https://github.com/petitoff/todo-app*

The Task Manager is a web application designed to streamline project and task management within teams. The application offers an intuitive user interface based on the latest frontend technologies, such as React, and utilizes Java Spring Boot as the backend, which communicates with a PostgreSQL database. To ensure secure user authentication and authorization, the application implements JSON Web Tokens (JWT) for session management.

- **Technologies**: Java Spring Boot, RESTful API, JSON Web Tokens (JWT), Spring Security, Postgres, ReactJS, TypeScript, Redux Toolkit, React Router DOM
